PROFESSIONAL SUMMARY

Recent Computer Applications graduate with a strong foundation in software development, artificial intelligence, UI/UX design, and cloud technologies. Experienced in designing and developing software solutions through academic projects, with proficiency in Java, Python, Kotlin, SQL, and modern development tools. Strong analytical, communication, and problem-solving skills developed through competitive debating and Model United Nations (MUN). Seeking to expand expertise in technology management, enterprise systems, and digital transformation through a Master of Business Information Technology program.

EDUCATION

Bachelor of Computer Applications (BCA)

Kristu Jayanti (Deemed to be University), Bengaluru, India

Graduated: 2026 | CGPA: 7.67/10

WORK EXPERIENCE

Summer Intern

Emstell Technologies, Kuwait City

May – July 2025

Assisted in redesigning the company website by enhancing UI/UX, participating in client's discussions and conducting Market Research.

CORE COMPETENCIES & SKILLS

- **Programming** : Java, Python, Kotlin, SQL, Dart, C, C++
- **Artificial Intelligence & Cloud**: Natural Language Processing (NLP), Langchain, LLMs, FastAPI, Model Deployment Fundamentals
- **Product, UI/UX & Design**: Figma (Wireframing, Prototyping, High-Fidelity Design), Material Design Principles, User - Centered Design
- **Business & Professional Skills**: Strategic Communication, Public Speaking, Business Analysis, Cross-functional Negotiation, Project Planning

KEY ACADEMIC & TECHNICAL PROJECTS

LaunchPad– AI-Driven Resume Analysis Platform (CapStone / Final Year Project)

- Developed an AI-powered mobile application using Kotlin, FastAPI (Python), and Supabase to evaluate resumes and provide an Applicant Tracking System (ATS) compatibility score.

- Integrated AI-based resume parsing to identify users' professional domains and provide personalized recommendations for improving resume quality and career readiness.

Enterprise Bank Management System

- Developed a desktop-based banking application using Microsoft Visual Studio (VB.NET) and Microsoft SQL Server to manage customer accounts, financial transactions, and banking operations.
- Designed a relational database and implemented secure transaction workflows, ensuring accurate record management, data consistency, and efficient SQL-based data processing.

Institutional Platform UI/UX Redesign

- Redesigned the homepage of an educational institution's website using Figma, focusing on user-centered design principles, accessibility, and intuitive navigation.
- Created wireframes and high-fidelity prototypes while applying Material Design guidelines to improve usability, visual consistency, and the overall user experience.

Cloud Infrastructure Deployment

- Configured and managed secure cloud storage resources using Google Cloud Platform (GCP) for hosting development assets and organizing project data.
- Applied cloud storage and access management concepts to enhance data availability, scalability, and secure resource management.

LEADERSHIP & STRATEGIC COMMUNICATION

Competitive Debater & Model United Nations (MUN) Delegate

- Represented institutional debating societies across multiple high-stakes simulations, refining competencies in geo-political analysis, public policy, and strategic compromise.
- Translated complex procedural arguments into structured verbal presentations under tight, high-pressure constraints, establishing a benchmark for executive-level communication.
